Habiba Ezzat

BUSINESS INFORMATICS | New Cairo | 01005055943 | habibaezzat4144@gmail.com

Business Informatics graduate (BSc, German University in Cairo) skilled in Python, SQL, Java and React, targeting graduate and entry-level roles in data, AI and machine learning, software development and finance.

EDUCATION

German University in Cairo (GUC) Sept 2022 - May 2026
Bachelor of Science, Business Informatics Cairo

- Database Systems: designed and queried a relational database.
- Business Intelligence: built dashboards.
- Machine Learning: trained and evaluated a model.
- Data Mining: built a prediction model.
- Software Engineering: built a web application.

International Arab Egyptian School Sept 2016 - Jun 2022
International General Certificate of Secondary Education (IGCSE) Ismailia

EXPERIENCE

Phoenix Consulting Aug 2025 - Sept 2025
SuccessFactors Consultant Intern Cairo

- Worked across 5 SAP SuccessFactors projects in Employee Central and Talent Management alongside the consulting team during a two-month internship.
- Took part in configuration activities for Employee Central and Talent Management modules as an intern working with the consulting team.
- Carried out requirements analysis and wrote project documentation across the SuccessFactors projects.

FI&CO Real Estate Apr 2026 - May 2026
Financial Data Tracking & Dashboard Intern Cairo

- Saved management 20 hours a month on expense reporting by consolidating marketing, maintenance, finishing and operations expenses across 10+ cost centers into one pivot-table dashboard.
- Delivered 3 reports and dashboards for management decisions by transforming raw financial records into structured reports and visual insights.
- Cleaned and organised up to 500 expenditure records by cost center, category, payment method and recipient.

PROJECTS

AI-Driven Behavior Mapping in Mobile Applications — Bachelor Thesis 2025 - 2026
Graduation project

- Improved reward by 40% over a baseline by developing a reinforcement learning-based recommendation model using a Deep Q-Network (DQN) to model evolving user behavior.
- Converted 100,000 sequential interactions from 10,000+ users into the states, actions, rewards and transitions used to train the DQN model.
- Trained and evaluated the model using 33,789 behavioral transitions.

Loan Approval Prediction – Data Mining Project

- Reached 95% accuracy on test data predicting loan approval outcomes by building Decision Tree and Random Forest models in Python on a 20,000-record financial dataset.
- Prepared a 20,000-record financial dataset for modelling by cleaning the data, running exploratory data analysis and engineering features.
- Compared the Decision Tree and Random Forest models by evaluating their predictive performance.

GUC Internship Management System

- Built the React and JavaScript frontend of a web-based system managing up to 200 student-company matches, alongside internship applications, document submissions and progress tracking.

ACTIVITIES

Local food bank Mar 2024 - Apr 2024

Volunteer

- Distributed 500+ food packages to families by sorting and packing donations at a local food bank.

SKILLS

Languages: Java, Python, C#, SQL, XML, JavaScript, HTML, CSS

Frameworks: React, ASP.NET Core, JUnit, TensorFlow

Developer Tools: Git, GitHub, VS Code, Visual Studio, Eclipse, Canva

LANGUAGES

Arabic (Fluent), English (Fluent), German (Basic)
